

## **Tendering Procedures**

### **Company Qualification Criteria:**

The criteria that will be used in the qualification of tenderers are as follows:

- The service provider's / contractor's experience and track record in implementing similar projects
- The service provider's / contractor's sound financial status
- The service provider's / contractor's proven capability and facilities for studies, engineering, manufacture, assembly, commissioning and testing of similar projects

### **Bid Evaluation Criteria:**

The tenders / bids will be evaluated on the basis of the economically most advantageous tender, taking into account the following factors:

- Price;
- Construction program;
- Technical performance;
- Technical expertise and capability;
- Operating and maintenance costs;
- Service availability and spare parts.

Further details with regard to the evaluation criteria will be provided in the tender document(s).

### **Eligibility of Bids:**

A review of each Company's Technical and Financial proposals will be carried out. Technical proposal(s) not considered to be eligible will be disqualified / rejected completely - without any notification.
